## Syllabus for the S.Y.B.Sc. Program: B.Sc.Course : BOTANY

| USBO402  | FORM AND FUNCTION II   | 2 Credits<br>(45 lectures ) |
|--|--|-----------------------------|
| Growth     Mechan     O     d     O     I  | <b>my</b><br>Secondary Growth in Dicotyledonous stem and root.<br>rings, periderm, lenticels, tyloses, heart wood and sap wood.<br>ical Tissue system<br>Tissues providing mechanical strength and support and their<br>isposition<br>girders in aerial and underground organs<br>f Vascular Bundles.  | 15 Lectures                 |
| Respirati     respirati     Photore     Photopo     referenc     phytoch     of SDPs | <b>Physiology and Plant Biochemistry</b><br><b>tion: Aerobic:</b> Glycolysis, TCA Cycle, ETS & Energetic of<br>on; Anaerobic respiration.<br><b>espiration</b><br><b>eriodism:</b> Phytochrome Response and Vernalization with<br>e to flowering in higher plants, Physico-chemical properties of<br>rome, Pr-Pfr interconversion, role of phytochrome in flowering<br>and LDPs;<br><b>zation</b> mechanisms and applications. | 15 Lectures                 |
| Unit III : Ecol<br>Biogeoc<br>Ecologic<br>factor, S<br>Commu                         | ogy and Environmental Botany<br>hemical Cycles- Carbon, Nitrogen and Water.<br>cal factors: Concept of environmental factors. Soil as an edaphic<br>foil composition, types of soil, soil formation, soil profile.<br>nity ecology- Characters of community - Quantitative characters<br>litative characters   | 15 Lectures                 |

|   | Semester III USBOP3  | Cr |
|---|--|----|
|   | PRACTICAL Paper II – FORM AND FUNCTION- II                                       | 1  |
|   | Cell Biology   |    |
| 1 | Study of the ultra-structure of cell organelles prescribed for theory from       |    |
|   | Photomicrographs   |    |
| 2 | Estimation of DNA from plant material (one Std & one Unknown, No Std Graph)      |    |
| 3 | Estimation of RNA from plant material (one Std & one Unknown, No Std Graph)      |    |
|   | Cytogenetics   |    |
| 4 | Study of inheritance pattern with reference to Plastid Inheritance               |    |
|   |  |    |
| 5 | Study of cytological consequences of chromosomal aberrations (Laggards,          |    |
|   | Chromosomal Bridge, Ring chromosome, Chromosomal ring) from permanent            |    |
| 6 | slides or photomicrographs.  |    |
| 6 | Study of mitosis and meiosis from suitable plant material                        |    |
| _ | Molecular Biology  |    |
| 7 | DNA sequencing- Sanger's method  |    |
| 8 | Determining the sequence of amino acids in the protein molecule synthesised from |    |
|   | the given m-RNA strand (prokaryotic and eukaryotic)                              |    |
|   |  |    |
|   |  |    |
|   |  |    |

|     | SEMESTER IV USBOT P4  | Cr |
|-----|---|----|
|     | PRACTICALS Paper II – FORM AND FUNCTION- II                                 | 1  |
|     | atomy   |    |
| 1   | Study of normal secondary growth in the stem and root of a                  |    |
|     | Dicotyledonous plant  |    |
| 2   | Types of mechanical tissues, mechanical tissue system in aerial,            |    |
|     | underground organs.   |    |
| 3   | Study of conducting tissues- Xylem and phloem elements in                   |    |
|     | Gymnosperms and Angiosperms as seen in LS and through maceration technique. |    |
| 4   | Study of different types of vascular bundles.                               |    |
| 5   | Growth rings, periderm, lenticels, tyloses, heart wood and sap wood         |    |
| Pla | nt Physiology and Plant Biochemistry  |    |
| 6   | $Q_{10-}$ germinating seeds using Phenol red indicator                      |    |
| 7   | NR activity – <i>in-vivo</i>  |    |
| 8   | Estimation of proteins by Lowry's method (Prepare standard graph).          |    |
| Eco | ology and Environmental Botany  |    |
| 9   | Study of the working of the following Ecological Instruments- Soil          |    |
|     | thermometer, Soil testing kit, Soil pH, Wind anemometer.                    |    |
| 10  | Mechanical analysis of soil by the sieve method & pH of soil.               |    |
| 11  | Quantitative estimation of organic matter of the soil by Walkley and        |    |
|     | Blacks Rapid titration method.  |    |
| 12  | Study of vegetation by the list quadrat method                              |    |
|     | ······································                                      |    |
|     |   |    |

- B. Germinating seeds/Onion
- C. DNA seq/AA seq.
- D. Cell organelles
- E. Plastid inheritance
- F. Chromosomal aberrations

## Syllabus for the S.Y.B.Sc. Program: B.Sc.Course : BOTANY

## **UNIVERSITY OF MUMBAI**

| S.Y.B.  | Sc. BOTANY              | PRACTICAL SKELETON PAPER  | SEMESTER - IV        |
|---------|-------------------------|---|----------------------|
| TIME    | - 2 hours 15 min        | PAPER – II  | Total Marks – 50     |
| Q.1. a) | . Make a temporary s    | ained preparation of T.S. of specimen 'A' an                      | d comment on the     |
|         | secondary growth/ n     | nechanical tissue system/ Macerate the given                      | material 'A' and     |
|         | describe the conduct    | ng tissue seen.   | (10)                 |
| Q.2.    | Perform the Physiol     | ogical experiment <b>'B'</b> allotted to you.                     | (13)                 |
| Q.3.    | Perform the Ecologi     | cal experiment 'C' allotted to you.                               | (13)                 |
| Q.4. Id | lentify and describe th | e specimen/ slide/ photograph - 'D' 'E' and                       | <b>'F'.</b> (06)     |
| Q.5. V  | iva - Voce.             |   | (05)                 |
|         |                         | Mechanical Tissue ( <i>Coleus stem, Typha leaf</i> , maceration). | Maize stem and Maize |

- B. Q10 germinating seeds using Phenol red indicator NR activity – *in-vivo* Estimation of proteins by Lowry's method
- C- Mechanical analysis of soil by the sieve method & pH of soil Estimation of organic matter of the soil Study of vegetation by the list quadrat method
- D Vascular bundles
- E. Growth rings, periderm, lenticels, tyloses, heart wood and sap wood
- F. Ecological Instrument
